Global inflation slowdown comes with increasingly diverging trends between key economies

Geopolitical instability remains key risk of global inflation resurgence in the short term

Multifaceted high-impact risks continue to cloud the recovery of the global economy in 2023

Real GDP annual growth forecasts and revisions from last quarter: AE

Real GDP annual growth forecasts and revisions from last quarter: EMDE

Inflation forecasts

Central bank interest rates quarterly forecasts

Global scenario map: Stagflation remains key global downside risk

Global Risk Index scores and rankings

Global Stagflation scenario: Vulnerabilities remain high for major economies

Global Bounce Back scenario: Faster-than-expected recovery possible with risks abating

Global Fragmentation scenario: A long-term drag on the global economy

KEY ECONOMIES OUTLOOK: Q3 2023

US: Resilience in consumer spending raises cautious optimism that recession can be avoided

US: Wage growth will continue to be major inflation driver until labour market cools

U S: Consumer and business confidence levels to improve from recessionary levels

US: Hard landing scenario remains realistic as financial conditions tighten further

China: Economic recovery slows as consumer spending and foreign demand falter

China: Consumer and business sentiment subdued amid fragile post-pandemic recovery

China: Low confidence, looming deflation and property downturn are major risks

India: A strong push in public spending to support short- and medium-term growth

India: More weather disruptions could slash agricultural output and reignite inflation

Japan: Services sector's recovery facilitates growth, but weak foreign demand is a risk

Japan: Volatile commodity prices and weak yen raise risks for Japanese firms and consumers

Indonesia: Domestic demand supports outlook, but falling exports a key growth constraint

Eurozone: Growth remains stagnant, though slowing inflation points to gradual improvement

Eurozone: Labour costs will become dominant source of persistent inflation going forward

Eurozone: Uncertainty remains unusually high in volatile economic and geopolitical phase

UK: Outlook improves as economy shows resilience, but multiple headwinds persist

UK: Sharper global slowdown, stubborn inflation and longer strikes among biggest risks

Russia: Outlook improves on resilient domestic demand, but external risks remain

Russia: Harder ramifications of the war in Ukraine are a major risk

Brazil: Agricultural sector boosts economy, but drag from restrictive monetary policy grows

Brazil: Extended period of peak interest rates presents key short-term growth risk

Mexico: Fastest growth expected in Latin America in 2023 due to re-accelerating economy

APPENDIX

Baseline and key alternative scenarios: Q3 2023

Other alternative scenarios: Q3 2023

About Euromonitor International

Euromonitor International is an independent market intelligence provider. Data, insight and analysis stem from in-the-field research spanning 210 national markets.

Content ranges from the in-depth and country-specific, to key strategic themes with a global range and significance. Products cover a comprehensive range of insights and market data, but can be broadly categorised as:

- **Strategy Briefings:** Global or regional in scope, and focussing on the most important themes shaping consumer demand, the key markets, competitive environment and future outlook across a range of industries.
- **Company Profiles:** Analysis dedicated to the world's most significant companies, with detailed insight into their activities, focus of operations, their competitors, their geographic presence and performance.
- **Country Reports:** For an in-depth understanding of specific countries, whether by industry, economic metrics or consumer trends and lifestyles. These reports cover current trends, consumer demand, market potential and future prospects, with country-specific local insight and comprehensive data, unavailable elsewhere.
